

Child's Calendar

Age: 3 years and up

What's needed

Weekly calendar (commercial or hand-made)
Markers

What to do

1. Hang a calendar down low for children to put their own activities on, whether it's going to preschool, child care, or a friend's house.
2. Use different colors of markers (age 4+) or stickers (age 3+) for different activities.
3. Children can draw a small symbol or picture instead of putting words.
4. Encourage the children to look at and talk about the calendar often.

What children will learn

Time awareness, patterns, numbers, math, self awareness
