

# Feely Glove

Age: 2-18 months

## What's needed

Glove  
Felt  
Fake fur  
Silk  
Burlap  
Corduroy  
Netting  
Glue or needle and thread

## What to do

1. Find an old glove and some fabric scraps with different textures that you can turn into a fun toy for infants.
2. Attach small pieces of fabric to the fingers of a glove by sewing or using a non-toxic glue.
3. Put the glove on and let babies feel the different textures.
4. Talk about how the textures feel.

Variations: When children get older, let them put the glove on their hands and feel the fingers.

### **CAUTION**

**Be careful that children do not chew off the fabric. Like all homemade toys, this one is designed to be used with an adult. Put the glove in a safe place when children are no longer interested in playing.**

## What children will learn

Sensory, listening
