

Musical Bottles

Age: 2 years and up

What's needed

Plastic bottles

What to do

1. Fill several empty plastic bottles with water of different levels. The containers should have different levels of water in them. Leave the lids off.
2. Show children how to blow across the top of the bottles to get different sounds from the air streams.
3. Compare the notes with the levels of water.

What children will learn

Music skills, fine motor skills, following directions
