

# Snow Hikes

**Age: 2 years and up**

## What's needed

A snowy day outside  
Outdoor winter clothing for the children

## What to do

1. Take a snow hike around the neighborhood.
2. Look for places that animals might live: in trees, under porches, in special houses, on the ground, or in the ground.
3. Ask children to predict what type of animal might live in each place and talk about what the animal might eat during the winter.

## What children will learn

Observation, predictions, science skills, large motor skills
