

Sound Sleuth

Age: 0-6 months

What's needed

No materials needed

What to do

1. With baby on her stomach, ring a bell in front of her that makes a pleasant tinkling sound while she is watching. Sound the bell again on the side just out of her line of sight. See if she will search for the bell with her eyes. She may try to turn her head to the sound.
2. Try this game again with a rattle, a squeak toy, or better yet, your own voice.

What children will learn
