

# Texture Collection

**Age: 18-24 months**

## What's needed

Empty egg carton  
Small objects with different textures

## What to do

1. Collect different items around your facility or home that have different textures—rough, smooth, bumpy, shiny, furry, sticky, etc. Here are some things you might use: sandpaper, aluminum foil, felt, cotton ball, sponge, wash cloth, tape, vinyl, beans, or un-popped pop corn.
2. Glue samples of the item securely into the bottom of each section of an egg carton.
3. Children will enjoy feeling and talking about the different things in the collection.
4. Make sure that each item is firmly glued into the egg carton each time children play with it.

## What children will learn

Sensory skills, language
